

FP 75 E PREMIERE

Dual-Format Projector

Especially developed for the demanding requirements of 70 mm projection, this dual-format projector offers uncompromising projection quality and perfect reliability.

Its one-of-a-kind digitally controlled PREMIERE intermittent drive guarantees an outstanding projection for extraordinarily crisp and bright pictures.

Top Features

- » Combined film path for 35 mm/4-perf. and 70 mm/5-perf. film
- » Quick and simple change of formats
- » Direct and highly dynamic digitally controlled intermittent drive
- » Optimum projection quality due to correction software
- » Picture steadiness values 3 times better than SMPTE standards
- » Excellent focus due to substantially extended picture dwell time and vibration-free film transport into the gate
- » Over 25% increase in light efficiency due to extremely short pull-down time of only 8 milliseconds
- » Continuous electronic framing
- » Continuously running electronically controlled shutters for increased brightness and flicker-free projection at all projection speeds
- » Electronically controlled reel shafts for gentle, constant film transport
- » 2 programmable projection speeds
- » Lamp capacity up to 7,000 W
- » Remote control and automation of projector and auditorium functions
- » Just like all Kinoton products: perfectly reliable and virtually maintenance-free

Film run mechanism

Replacement parts for change of format:
on the top: 70 mm / at the bottom: 35 mm

Technical Data

Mains Voltage	115 V / 120 V / 230 V / 240 V
Mains Frequency	50 / 60 Hz
Power Input	800 VA (without light power supply)
Net Weight	250 kg (550 lbs) (without light source)
Gross Weight	425 kg (959 lbs) (without light source)
Film Formats	35 mm 4-perf and 70 mm 5-perf

See the Difference.
